

NAD⁺OVIM®

NAD⁺ RESEARCH

There is tremendous excitement over the current research of NAD⁺, being heralded as "one of the most important molecules to ever exist." Studies have shown NAD⁺ to be effective in repairing DNA and lengthening telomeres (anti-aging). Researchers have also stated the coenzyme acts as a "fundamental mediator of brain functions, brain senescence and multiple brain diseases."

A NEW BRAIN SUPPLEMENT

Brain fog; memory loss; poor concentration; it's an unfortunate truth, but more and more suffer from these brain related symptoms. That's what led Dr. Thomas K. Szulc and the NYCIM medical team to search out a solution. Introducing Nadovim®.

The first bioenergetically selected and enhanced nutraceutical supplement, Nadovim is a game-changer in the field of brain health. Widely known for its anti-aging and neuro-protective properties, NAD⁺ (*nicotinamide adenine dinucleotide*) is the foundational ingredient of this unique mix of natural compounds that maximally support total brain health.

A comprehensive formula that incorporates cognitive enhancing coenzymes (*NAD⁺ / CoQ10*), botanicals (*Bacopa / Cat's Claw*), amino acids (*Glycine / Aspartic Acid*), and minerals (*Magnesium*), only two capsules of Nadovim per day supply the body with what is required for energy production, regulation of neurotransmitters, and maintaining healthy brain function.

WHY USE NADOVIM?

Nadovim is the first and only supplement on the market created by Dr. Szulc and based on rigorous compatibility testing to ensure specific synergistic ratios (down to the milligram) of ingredients for an unparalleled impact on the brain. Each raw ingredient is tested by the NYCIM medical team for purity, potency and regenerative energetic qualities. In addition, Nadovim is produced in a state-of-the-art, FDA-approved pharmaceutical development and nutraceutical laboratory and third-party certified for adherence to Good Manufacturing Practices (GMPs) by NSF, widely recognized as the most stringent of certification parties in the industry.

"NAD⁺ is probably as important as oxygen to make cells work. It's in every cell of your body; it's in every mitochondria. It has multiple functions."

Richard Mestayer, MD,
Medical Director, *Springfield Wellness Center*

HOW IT WORKS

This specialized formula acts directly on the brain, enhancing mitochondrial function (think brain energy) and reducing oxidative stress in the brain. In addition, Nadovim improves kinase activity, neuronal synthesis, restoration of synaptic activity, and nerve impulse transmission - all necessary for optimal cognitive functioning. NAD⁺ has been shown to stimulate production of dopamine, serotonin, and noradrenaline, while decreasing levels of cortisol, thereby reducing stress and improving mood.

PURCHASE NADOVIM

NYCIM is proud to be the first center in the world to provide Nadovim directly to patients. After years of research and development and clinical experience with the ingredients in Nadovim, Dr. Szulc has finally created a supplement that has met the extremely high standards required to help restore proper brain function. *Ask the front desk about purchasing Nadovim.*
